

## IN SUMMER B WE WILL BE LEARNING:

This half term we will be focusing on a variety of weekly themes including Get Moving where we will focus on PE and music, science enquiry, becoming technical engineers in DT and many more. The children will have many opportunities throughout this half term to take part in science experiments, plan and create a DT project and improve their physical skills through lots of PE.

## Maths and English

This half term we will be giving the children many writing opportunities and looking at a wider range of punctuation and spellings in a variety of texts. We will be reading stories such as Cinderella, The Three Wishes and On a tall, tall cliff. We will also be inviting the children to a class party where they will then write about their experiences through a recount.

In Maths we will be learning about weight, mass, capacity and volume. After that we will be revisiting many mathematical concepts to ensure the children are ready for Year 3.

## Science

This half term we will be focusing on scientific enquiry. We will be learning many scientific skills including observation, completing fair tests and asking scientific questions.

## READING TO SUPPORT OUR LEARNING:

Reading a variety of stories including traditional tales to enhance the children's language and vocabulary.

Information books about science, including scientific experiments and fair tests.

Information books about DT, art, science and anything your child is very interested in.

## WHAT YOU CAN DO AT HOME TO SUPPORT THE LEARNING:

+ - x ÷

Help your child by practising all 4 calculations including addition, subtraction, multiplication and division. The children will have a written or mental strategy to solve these problems.

If you would like to stretch your child's mathematical understanding read word problems to the children including one step and two step problems

Keep reminding children about their times tables. Focus on 2, 5, 10 and 3.
