Summer B 2021

MFL

As Foreign language speakers this half term, we will be developing our understanding of colour names, expressing and sharing opinions in Spanish and formulating sentences orally using the correct word order.

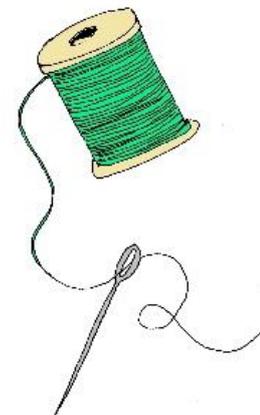

PSHE

In PSHE this half term we will be discussing personal achievements and skills, identifying what a positive learning attitude is and talking about skills and interests needed for different jobs and careers. As part of 'planning for the future' we will be thinking about 'Growth Mind set' identifying which skills are needed for different roles, knowing what stereotypes are and how to challenge them. We will also be setting goals and ambitions. Finally, we will be looking at what challenges we might face in the future and thinking about how we might overcome them.

Design and Technology

This half term as designers we will be following a given brief (purpose) to research, design, create and evaluate a new flag for Spain. We will be developing our creative, technical and practical expertise through the creation of own flags and will make them using different materials and joining techniques such as sewing.

Art

During this half term, we will be investigating primary and secondary colours and predicting what colours we can make through mixing of other colours. We will be creating portraits in the style of Picasso, using our knowledge of the colour wheel to use contrasting colours. Also, we will be creating our own print blocks to design our own prints in the style of Andy Warhol.

Music

In Music, we will be learning a unit of music based on Mamma Mia by ABBA - A timeless Pop song from the 70s. **The adapted for COVID version of Mamma Mia** offers a replacement activity for Learn to Sing the Song. This activity focuses on creating rhythm patterns that begin after a rest (silence) in the same way that the first three lines of the chorus from Mamma Mia do.

PE

In PE, we will be improving our overall fitness and skills with athletics and circuit training activities. This will improve our wellbeing which links to having a healthier lifestyle. We will be aiming to raise our heart beats and get the blood flowing around our bodies with a range of physically challenging movements including, jumps, balances, and sequencing actions.
