

Year 4's Summer B Newsletter

Week 1 - Get Moving

Summer B will begin with exercise and music! The two subjects that we will be prioritising, alongside the core subjects, will be P.E. and Music. In P.E, we will be focussing on cricket. During this unit, we will develop our throwing and fielding skills and learning the rules of the game. In Music, we will be studying music from the Beatles.

Week 2 - Let's Explore

It's time for some Science. During this week, we will be developing and refining our investigative skills. Each lesson will focus on an area of scientific enquiry including making, predictions, choosing and using scientific equipment safely, recording our measurements and findings and then discussing what we have found out. Lots of practical work and lots of fun!

Week 3- Viva Espana!

Hola! In week 3, we are going to be studying Spain and the Spanish language. We will be learning numbers, months and birthdays in Spanish and even calculating in Spanish! Fantastico!

Week 4 - Future Engineers

During this week, we are going to combine our design and technology skills with Science to create our own working torch. Throughout the week, we will investigate, explore, design and make ending with a successful product which fits our design brief.

Week 5 and 6 -Art/Transition

For the last part of the term and of the school year we will be having an art focus in our curriculum lessons. In Art, we will be focussing on the concept of change and transition. We will be studying abstract art forms; using symbols and images to represent feelings that arise when faced with difficult choices and changes in life. This will also be a time to get 'year 5' ready, where we will have time with our new teachers in our new classrooms. An exciting time!
