

In Summer A...

This half term we will be studying a variety of topics. Each week we will be taking on a different theme, which will run through our curriculum. See below for each week's theme:

Week 1	PSHE – Health & Wellbeing
Week 2	PSHE – Rights Respecting
Week 3	Geography – Our Amazing World
Week 4	Geography – Map Skills and Orienteering
Week 5	Computing – Coding
Week 6	RE – Wisdom & Belief

Our English lessons we allow us to use the knowledge we have learnt in these topics to write different types of texts, including: diary entries (recounts), instruction texts, a quest myth and persuasive writing.

For Maths this half term, we will learn to measure and calculate area and perimeter of shapes, as well as learning how to work with and convert between fractions and decimals.

READING TO SUPPORT OUR LEARNING:

Each week we will be focussing on a different text in English and guided reading, to link with our learning across the curriculum.

We will continue to use MyOn.co.uk for our weekly reading, as well as books from our class libraries. Having our new Horizons iPads means that all our children have hundreds of books available to them in this online library.

The Reader of the Week raffle will continue to take place for children who have spent an hour reading in their own time.

WHAT YOU CAN DO AT HOME TO SUPPORT THE LEARNING:

- Read with your child every day. This will increase their vocabulary and familiarise them with a wide range of genres.
- Encourage your child to read aloud to an adult and discuss what they have read.
- Ensure your child completes their homework each week (spellings, reading and either a maths or English task weekly).
- Sign your child's reading record three times a week to show what they are reading at home.
