

### IN Summer A WE WILL BE LEARNING:

This half term we will be studying a variety of topics. Each week we will be taking on a different theme, which will run through our curriculum. See below for each week's theme:

Summer A	Focus of Teaching	Weekly Theme
Week 1	Health and Wellbeing – focus on PE (including Walk to School)	Begin to Look Forward
Week 2	Rights Respecting Week	Kids Rule
Week 3	Geography – Our World and Beyond	Our Amazing World
Week 4	Geography (Orienteering and Map skills)	Heading in the Right Direction
Week 5	Computing – Science Fiction	Mission Impossible
Week 6	RE – Islam.	Wisdom and Belief

During Maths we will be working on measure and converting between units, alongside problem solving. We will also learn about statistics, including interpreting information from line graphs and pie charts and creating our own graphs and charts.

### READING TO SUPPORT OUR LEARNING:

Each week we will be focussing on a different text in English, to link with our learning across the curriculum.

On Myon you'll find lots of books which relate to the weekly theme. By reading regularly you will not only improve your reading, but you will also help to develop your understanding across the curriculum.

### WHAT YOU CAN DO AT HOME TO SUPPORT THE LEARNING:

- Read with your child every day. This will increase their vocabulary and familiarise them with a wide range of genres.
- Encourage your child to read aloud to an adult and discuss what they have read.
- Ensure your child completes their homework: Maths, SPAG and Reading.
- Read the revision pages in your child's CGP Revision Booklets to support your understanding of what they are learning.
- Assist your child in learning their times tables with the corresponding division facts.
