

## IN AUTUMN B WE WILL BE LEARNING:

### Geography

Our project this half term is called 'Celebrations and Cultures' and will be geography based. We will be focusing on comparing Manchester to Pakistan, locating Pakistan on a world map and learning positional language. The children will have lots of opportunities to look at world maps and look at the human and physical features of Manchester and Pakistan.

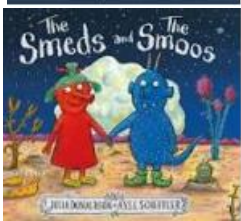

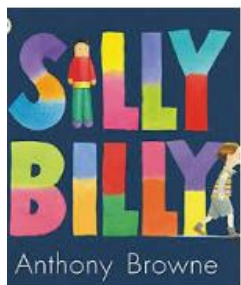

### Maths, English and Science

The story we will be reading in English is 'Little Charlie' by Pie Corbett. The children will have the opportunity to write their own version of Little Charlie and publish their own story. We will then be learning all about poetry and then our final weeks of we will be writing a set of instructions of 'How to get to Grandma's house' which links with the Little Charlie story.

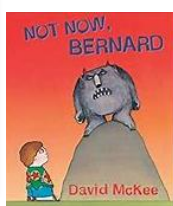

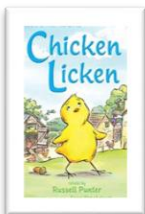

In Maths we will be learning how to solve addition and subtraction word problems, read and interpret graphs, learn how to measure length and multiply by 2, 5 and 10.

In Science we will be learning all about living things and their habitats. The children will have opportunities to compare living things and their habitats. We will also be looking at the basic needs of animals and how their habitats provide them with their basic needs.

## READING TO SUPPORT OUR LEARNING:

Here are some books that we will be reading with the children throughout Autumn B.

## WHAT YOU CAN DO AT HOME TO SUPPORT THE LEARNING:

Read with your child every night and ask them some questions about what they have read.

Practise your 2, 5 and 10 times tables.

Practise writing interesting sentences with conjunctions such as 'and or' because'. They can also include an expanded noun phrase.

The scary, orange alien and the monkey were jumping on the hill.
